Digital Egypt pioneers Initiative- DEPI مبادرة الرقمية مصر رواد

Courses

2024 **Introduction to Web Development**
Creative

2022 **It fundamentals**
Udemy

Projects

recipes-sharing [↗](#)

Developed a responsive recipe-sharing platform using Angular 18, featuring API-driven recipe data, And a favorites system. And used Bootstrap for responsive design.

Tech stack: Angular 18, Bootstrap.

Hospital management system [↗](#)

Hospital Management System

Created a comprehensive hospital management system to streamline administrative and medical operations. The system includes features for managing patients, appointments, and medical records. Built using Angular 19 with Firebase for backend services and real-time database and authentication . Implemented SweetAlert for interactive alerts, and used Angular Material and Bootstrap to ensure a modern UI. The project was version-controlled with Git and deployed via Netlify.

Tech Stack: Angular 19, Firebase, Bootstrap, Angular Material, SweetAlert, Git, Netlify

Ai-chatbot. [↗](#)

Built an interactive AI-powered chatbot website that provides real-time responses to user queries. Implemented natural language processing for dynamic conversations and integrated APIs for enhanced data retrieval. The site is fully responsive and optimized for both desktop and mobile users.

ToDo App [↗](#)

A task management ToDo application built with Angular, featuring user authentication, CRUD operations for tasks, and a RESTful API backend deployed on Railway.

portfolio [↗](#)

A responsive portfolio website built using **React** and **Vite** to showcase skills, projects, and contact details.

similarity-game [↗](#)

A fun and interactive **memory matching game** built with modern web technologies, showcasing my skills in frontend development, user interface design, and dynamic game logic.
